Declaration of Solidarity

I support the demands of the German campaign "Büchel is everywhere – nuclear weapons-free now!":

- Stop the upgrade of nuclear weapons in Germany
- Withdraw nuclear weapons from Büchel
- Ban nuclear weapons

and I declare my solidarity with those who engage in non-violent actions, including non-violent civil disobedience. I allow my name to be published on Internet at the campaign web-sites as a signer of the solidarity declaration.

Agreed framework for action:

When we take part in non-violent direct action, we will not use or threaten to use physical violence against any person, especially in situations where violence is being used against us. No participant in the action should hold another person against their will, push them or injure them in any way. We do not want to behave insultingly or humiliate others, rather we wish to treat others (e.g. police, soldiers, those opposing our actions) with respect, despite the fact that we may be critical of the actions they take, due to their role in society. This also remains valid should it come to legal proceedings as a result of our action, during which we will naturally behave with solidarity towards one another. The complete agreed framework for action can be found on our home-page in German:

Stop new nuclear bomb – B61-12 – for Europe!

**US citizens solidarity declarations
needed – strengthen the global network!**

German campaign to send the existing US nukes back home, and to organize against the new B61-12 US nuclear bomb, which is planned to be built in the US by 2020 for five European countries (Italy Belgium, Holland, Turkey and Germany):

Despite the end of the Cold War, about 20 US nuclear bombs are still deployed at a German air force base named Büchel. German pilots will have to take off with these bombs in

Some of the participants at the Büchel camp, International Week, July 2018.

Tornado fighter planes when the order comes from the US president, through NATO, to drop them on their targets. This horrifying vision is part of the "nuclear sharing agreement" in NATO, with its nuclear deterrence policy, and includes the first strike option. These weapons of mass destruction – illegal under both German and international law – are planned to be replaced by expensive (\$12 billion) new, precision-guided nuclear weapons in the near future, through the National Nuclear Security Administration's nuclear weapons complex. All three nuclear Laboratories (Y12 Plant, Kansas City Plant and Sandia Lab) are part of B61-12 construction, mainly through Boeing (tailfin kit: \$1.8 billion), Lockheed Martin, Honeywell and Bechtel. With about 400 B61-12 bombs to be refurbished, that's about \$25 million per bomb, according to expert Hans Kristensen.

20 weeks of action at Büchel

Twenty weeks for twenty bombs – starting again on March 26*, 2019 until August 9th, groups and individuals will hold vigils and other kinds of nonviolent direct action (blockades, trespassing, etc.) at the Büchel base to pressure the government.

**On March 26, 2010, an all-party Resolution in Germany's Parliament called on the government to seek the withdrawal of US nuclear weapons.*

Declaration of Commitment

Our German-wide campaign "Büchel is Everywhere – nuclear weapons-free now!" is organized by 50 organizations/groups. The active presence at Büchel is planned to be the beginning of a long-term phase of action to prevent the nuclear upgrade. The core element of the campaign is our Declaration of Commitment signature campaign where people declare in public (on our website): *"I will come to Büchel once a year and take part in an action until nuclear weapons are withdrawn, and I will actively commit to seeking a nuclear weapons-free world in the place where I am living."* We will also have an international week of action from July 8th to the 16th in 2019.

If you are interested in joining, please contact: **mariongaa@gmx.de**, or via our website: **www.buechel-atombombenfrei.de**, and let us know about any support you might need. All kinds of housing, including camping opportunities, exists in this beautiful volcanic

region. There will be an office and a contact person nearby. In 2016, 2017 & 2018 we had 20 weeks of actions with 45 religious, peace, women, anti-nuclear, and other groups participating.

Declaration of Solidarity

In addition we have a Declaration of Solidarity especially for people who cannot come, but who want to show their full support (please sign on the other side of the page).

In Germany, the peace movement always risks being considered "anti-American." With plenty of signatures from the US peace & justice movement, we can show that we are united in our vision for a nuclear-free world – also with indigenous peoples and other people of color, who are disproportionately impacted by the nuclear production chain. We don't want new nuclear weapons, and we believe the money should go to people's real needs!

Kathy Boylan, Sr. Ardeth Platte, Sr. Carol Gilbert, and Susan Crane joined a go-in action, July 2017
